

Husniddin Salohiddinov

Backend Developer

As a strong believer in the ability of problem-solving and research combined with critical thinking, I approach every coding challenge as an opportunity to innovate and elevate. My journey in programming is marked by a commitment to continuous learning, adapting to emerging technologies, and a dedication to producing solutions that not only meet requirements but exceed expectations

EDUCATION

Bootcamp(Foundation)

Najot ta'lim

05/2024 - 10/2024

Tashkent

Courses

- Basics of C
- Object Oriented Programming(OOP)
- Data Structures and Algorithms
- Entry to Python
- Entry to databases(MySQL)

Bootcamp(Full-Stack)

Najot ta'lim

09/2024 - 03/2025

Tashkent

Courses

- JavaScript (Advanced)
- TypeScript & Nest.js
- REST & GraphQL APIs
- Version Control & DevOps(Git, GitHub, Docker, CI/CD)
- Security & Authentication (JWT, CORS)
- Node.js Express.js
- Database Management (SQL & NoSQL)
- Testing & Performance Optimization (Jest , Redis)
- React.js Next.js

ENGAGEMENTS

Leetcode (08/2024 - Present)

LeetCode <https://leetcode.com/u/Husniddin/>

SKILLS

- JavaScript
- TypeScript
- Node.js
- Express.js
- Nest.js
- PostgreSQL
- MongoDB
- TypeORM,
- Prisma
- GraphQL
- RESTful APIs
- Docker
- React
- Next.js
- Telegram Bot

PROJECTS

Mock API Generator (01/2025 - Present)

- **Tech Stack:** Node.js (Express.js), JWT Authentication, Joi Validation, MongoDB, React.js
- Developed a **Mock API Generator** that allows frontend developers to quickly create and test APIs without needing a full backend setup. This tool simplifies API testing by generating custom endpoints with real-time authentication and validation.
- **GitHub Link** [🔗](#)
- **Live Demo** [🔗](#)

Street Sport – Sports Arena Booking System (02/2025 - Present)

- **Tech Stack:** NestJS, PostgreSQL, Sequelize, OTP Email Verification, React.js Redux
- A **sports arena booking platform** designed to help users find available football match arenas in their local area. The system allows users to easily book arenas, check availability, and manage their bookings. The project also includes an **admin panel** for managing arena details and overseeing bookings.
